

# SAFE NAVIGATION PLATFORM FOR WOMEN

One Woman. Infinite Power.

**NAME : ARCHITA SINGHA**

**PROBLEM STATEMENT : SAFE NAVIGATION & ROUTE  
OPTIMIZATION PLATFORM  
ELITE HER HACKATHON**

# The Challenge — Safety Over Speed

- Existing navigation apps focus on **fastest routes**, not **safest paths**.
- Women often face **fear and uncertainty** when traveling alone.
- **Safety data** like lighting, crowd density, and crime zones are not **visible** in current maps.
- Lack of **real-time alerts** and **trusted contact integration** during emergencies.

# SoloForce — Safe Navigation Platform for Women

Suggests **safest routes** based on safety factors like lighting, crowd density, and crime data.

Displays **real-time safety** scores for each route.

Includes **emergency contact button** and **safe-zone markers**.

Designed for **simplicity and accessibility** — empowering women to travel confidently.

# What Makes SoloForce Unique

## **Interactive Map –**

color-coded routes (green = safe, red = unsafe).

## **Safety Score –**

quick visual rating for each route.

## **Safe-Zone Markers –**

highlights well-lit or crowded areas.

## **Responsive Design –**

works seamlessly on mobile and desktop.

**Emergency Button –** one-tap alert to trusted contacts.

# How SoloForce is Built

## Frontend :

HTML, CSS, JavaScript  
(React optional for  
dynamic UI)

{JavaScript}

## Design Tools :

Figma / Canva for UI  
mockups and slide  
visuals

## Mock Data :

JSON datasets  
simulating safety  
factors (lighting,  
crowd density, crime  
zones)

## Map Integration :

Leaflet.js or Mapbox API  
for route visualization

# Empowering Safer Journeys

**Confidence for Women —**  
enabling independent travel without fear.

**Safer Communities —**  
awareness of unsafe zones reduces risks for everyone.

**Scalable Vision —**  
potential to integrate with city safety data and navigation apps.

**Social Good —**  
aligns with hackathon's theme of empowerment and innovation.

# Beyond the Hackathon

## City Data Integration —

connect with municipal safety databases for real-time updates.

## Global Reach —

scalable to different cities and countries.

## Mobile App Expansion —

polished Android/iOS app with intuitive UI.

## AI-Driven Insights —

predictive safety scoring using machine learning.

## Community Collaboration —

crowd-sourced reports of unsafe areas.

**Potential to impact millions of women worldwide**

Safe Navigation Concept — routes color-coded for safety.

Empowerment Through Technology — confidence in every journey.

# SOLOFORCE — ONE WOMAN. INFINITE POWER.

Vision Beyond Hackathon — scalable, impactful, global.

Call to Action – Together, let's build safer paths.

**Thank you — let's build safer paths together..**
